

**Title of the presentation in English**  
**(Write here the Spanish version of the Title)**

Name and Surname of the first author, Name and Surname of the second author

<sup>a</sup>*Institution of origin of the first author*

<sup>b</sup>*Institution of origin of the second author*

---

**Resumen**

(The abstract must be structured and not exceed 250 words in length). Problematic: (brief description of the problem). Objective (s): (mention of the objectives set out in the study). Methodology: (brief description of the methods used in the study). Results and discussion: (main results obtained). Conclusions: (main conclusions).

*Palabras clave:* (No more than 6, it is recommended that you do not repeat terms that appear in the abstract. Each word must be written with a capital initial letter and be separated by a semicolon).

---

**1. Introduction**

Review of the scientific literature published in relation to the topic of the presentation. Authors who deem it necessary can create sub-sections using hierarchy 1.1 and including a title to be developed. The introduction should not be lacking in the exposition of the problem that favors the realization of the study, the statement of the objective (s)

**2. Methodology**

(The type of research, methods and techniques used must be exposed; in addition to other aspects that due to the type of study should be included).

---

*Email address:* Contact information (Name and Surname of the first author).

### 3. Results and Discussion

(The results obtained are presented after explaining the techniques selected and described in the previous section. Tables and figures are included that clearly express the results of the study carried out by the researcher without repeating what is indicated in the text. More than the technical solution presented, it is expected to find those elements that make what has been done a novelty or an improvement in its field of action and its superiority with respect to similar solutions. The discussion presents the analysis of the results obtained that must correspond to the objectives set out in the article).

(Graphics, tables and illustrations must be mentioned in the body of the text. A caption of graphs, tables and illustrations must be placed for each one and the source from which they come should be mentioned. If the graphs, tables and illustrations are prepared by the authors, the source will be: own elaboration).

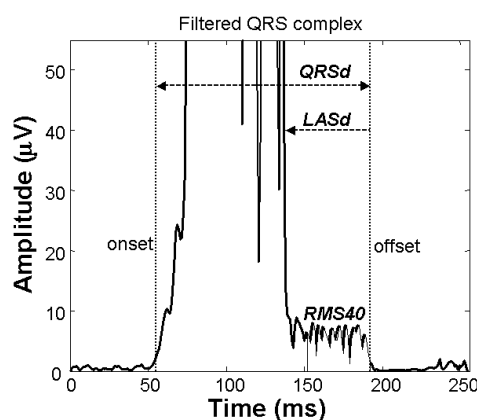

Figure 1. The title of the figures will be placed in the lower part, centered, using sequential numbering according to the order in which they appear in the work (Times New Roman at 10 points).

### 4. Conclusions

(The conclusions are derived from the work carried out. Any conclusion must be based on what was exposed and discussed in the work and must reflect the fulfillment of the objectives. They should indicate how the work contributes or is an advancement in the field and object of study. They should also suggest future uses and work).

### 5. Bibliographic references

For the preparation of citations and references the authors are free to use the bibliographic standard or style they deem appropriate. The use of the Harvard standard is suggested.
